

Project Part 0

Due date

Thursday 16 Feb before 11:30 PM

This part has no marks, but late submission will be penalized through part 1.

Requirements

You will create a front-end web application for a fictional organization or a company that sells/rents products (e.g., toys, electronics, cloths, cars, etc.) or provides services (e.g., fitness club, automobile maintenance, carpet cleaning, etc.).

Decide what company/products your website will be about and get your instructor's approval. Make sure your idea is unique (not taken) and make sure to get the approval before starting the project. If your idea is not approved, you will have to provide another idea before the due date so make sure to discuss your idea with the instructor as early as possible.

Students in section 1/2, 7/8, and 9/10 can go to the link below, find their name, and fill up the information about their project:
