Project Part 3

Due date
Sat 11 March before 11:30 PM

Requirements

In this part, you will complete the *Subscribe* and *Contact us* pages which will mainly contain forms collecting information from users of your website as described below.

1. Create the *Subscribe* page which will contain a form collecting information from users who want to register as members of your online service.

   At minimum, the registration form must contain two fieldsets with the input fields below, but you may add more if you wish or find necessary for your website. Style your fieldsets appropriately.

   First fieldset:

   a. A field for the full name.
   b. A field for username.
   c. A field for password.
   d. A field to confirm the password.
   e. A field for e-mail address.
   f. A field to confirm the e-mail address.
   g. A field for phone number, with +974 appearing as the default value.
   h. A field to collect the date of birth of the user.
   i. A number field to collect the age of the user.

   Second fieldset:

   j. Inputs for shipping address, including:
      i. Building number.
      ii. Street name.
      iii. City name from a dropdown list containing major cities in Qatar. Default city should be Doha.
   k. A checkbox asking if the user would like to subscribe to the newsletter.

2. Create the *Contact us* page which will contain the following:
   a. Contact information of your company such as the address of the company's head office, hours of operation, phone number and e-mail address of the customer service department, etc.
   b. A map showing the location of the company's head office. You must embed a Google map in the page (search on how to do this).
   c. A form collecting information from users who want to send a direct message through your website. The form have one fieldset which includes at least:
      i. Input field to collect the name of the user.
      ii. A text area for the user to write their message.
      iii. Radio buttons to denote the preferred method of contact (phone call, email, etc.).
      iv. An input field to collect the email address of the user.

3. Remember to add buttons to submit and reset the fields in both pages.
4. Apply styles to both pages so that the elements are nicely displayed in the page. The styling is left to you, but it must harmonize with the styling of other parts of the page.

5. Both forms must submit data to the file below on our SIT server: https://sit.cna-qatar.edu.qa/processform.php

Submission

Zip the whole folder containing all your website files (including HTML files, style sheets, and image files) as a *.zip* not as a *.rar* and submit to the drop box on D2L.
